TIMUN MAS

Timun Mas offers editions in Catalan for children of ages that range from a few months to seven years and has a catalogue that coincides almost exactly with the editions in Spanish. The publishing company covers such well-known characters as Teo or Carla and reputed authors in this genre such as Debi Gliori. It also contains compilations of great tales. And all presented in different formats such as bathtime books and textured books or with sounds, or pop-ups, with surprises, always of great quality. They are books that help children to discover, experience, play and reflect on the world around them and that contribute to their personal growth.

DESTINO INFANTIL & JUVENIL

The catalogue in Catalan of Destino Infantil & Juvenil does not fully coincide with the editions published in Spanish but does cover some of the favourite collections of children aged from 3 to 12 years, such as *Les Cròniques de Nàrnia*, *Geronimo Stilton* and *Arcanus*, a new mystery, magic and adventure series written by Care Santos.

As for books for smaller readers, Destino Infantil & Juvenil enjoys great prestige for the quality of its illustrated picture books. Among its successes are the books of *Les Tres Bessones*, especially the pop-ups; the series with the character Didó, or the marvellous illustrated albums of Babette Cole.
